Fastline Fred's Tips:

- Always change the stone before reaching the minimum wear.
- Make sure the guard is fitted and tight before using.
- Use the correct tightening tools every time.
- Be careful not to cut through the cable when finished grinding and the wheel is still turning.
- Always use the correct spanner on nuts and bolts as constant use of adjustables causes damage.
- In case of breakdown call the Fastline Control Centre – 0854 450 2045
